ABOUT ME

I am a Systems Engineer with extensive experience in Quality Assurance (QA), focused on both manual and automated testing. My passion for software development and my commitment to excellence in QA have allowed me to collaborate closely with multidisciplinary teams and play a significant role in making technical decisions.

As an automation testing specialist, I possess extensive knowledge in Serenity, which I use to execute tests on APIs, Web, and Android (Appium). Additionally, I have skills in programming languages such as Javascript and Java, which are essential for my tasks.

My track record demonstrates my ability to ensure software quality and improve the efficiency of the testing process. I am dedicated to continue growing and learning in a challenging and dynamic environment, always seeking new challenges and opportunities for professional growth.

WORK EXPERIENCE

SKYDROPX
Bogotá D.C.
Aug 2023 - Present

QA Engineer

The role encompasses defining departmental responsibilities, assembling a proficient team, formulating QA strategies closely aligned with the Engineering department, workload allocation, comprehensive documentation, and reporting of functional, design, or code quality issues, initiation of automated acceptance testing processes for new developments, as well as proposing and implementing procedures aimed at elevating development quality.

CHIPER SAS
Bogotá D.C.
Mar 2022 - Jul 2023

QA Automation / QA Senior

I have specialized in developing automated tests for APIs, web applications, and mobile (Android) at Chiper, using the Screenplay pattern in Serenity/JS. My responsibilities included designing test cases in Gherkin, which were later implemented in automated regression tests. Additionally, I have led collaborating testers in their respective company projects.

LULO BANK SAS
Bogotá D.C.
Oct 2020 - Mar 2022

QA Senior

I designed and executed acceptance and regression test cases, with a focus on core banking/back-office systems in AWS. I was distinguished for my participation in the refactoring of the automation suite and ensuring quality in testing for credit and banking deposit applications, under SCRUM.

OLAM TECHNOLOGIES / CAP TECHNOLOGIES.
Bogotá D.C.
Jul 2019 - Jul 2020

QA Lead

I had the honor of leading the QA team of the company, taking on the responsibility of organizing, maintaining, and executing the testing plan for the Picap/Gocap platforms. During my tenure, I fostered a culture of quality within the company, encouraging an environment conducive to learning and continuous growth of the QA team. Successfully, I raised the standards and software quality metrics through an appropriate working methodology.

EDUCATION

UNIVERSIDAD CENTRAL DE COLOMBIA
Bogotá D.C.
2018
