Language: Spanish,
English intermediate

I am a passionate JavaScript Developer from Colombia with nearly 3 years of full-stack development experience. My main expertise lies in **React**, **Node.js**, and **Next.js**. I am skilled in clean code practices, clean architecture, SOLID principles, and React component design patterns, primarily focusing on e-commerce development. However, I am capable of building any type of application. Additionally, I have an eye for design and can work effectively in both development and design roles, making me a versatile and multidisciplinary professional.

Work experience

Arrecife | Next.js Developer

Colombia | Dic 2024 - Current

- Currently, I'm developing a robust, scalable, multi-regional, and multilingual headless marketplace for a new startup in Colombia. Powered by an AI-driven search engine, I'm using Medusa.js as the backend core, **Next.js** for the frontend, Supabase as DB and Strapi as the Headless CMS, integrating third-party APIs and analytics services to enable comprehensive data tracking and insights.

Additionally, I'm applying advanced tactics like server-side rendering to achieve maximum performance and SEO optimization, while prioritizing scalability and security by implementing best development practices. Always mindful of maintaining the project's cloud infrastructure as low-cost as possible and ensuring an omnichannel experience and seamless integration across all channels.

- Developed a robust, multilingual platform for content creators as a Front & Backend developer, prioritizing scalability and security by implementing best development practices with **Next.js**. (Uhh! Platform). Leveraged real-time techniques for chat streaming and implemented a robust logic for role, content management, and cryptocurrency payments.

Blacksip | Vtex IO & React Developer

Colombia | Jun 2023 - Dic 2023

- Experienced in operating, developing, optimizing, and maintaining e-commerce platforms on Vtex IO for leading clients such as DiageoThe Bar Co, Pilatos, and Dinners club peru..

- Proficient in building reusable components using React for Vtex IO.

- Effective communication skills in resolving client issues and minimizing re-processing, ensuring client satisfaction and project success.

- Build PoCs to expedite e-commerce development.

Wander | Next.js Developer

United States | Setp 2022 - Jun 2023

- At Wander, I was part of a team responsible for maintaining and updating the interface of a luxury platform akin to Airbnb in the US, utilizing technologies such as React and Next.js.
