

PROFILE

I am a professional with solid experience in the support and monitoring of process automation systems, specialized in performing quality tests, both manual and automated. My focus is on ensuring the efficiency and reliability of the systems implemented. I possess outstanding skills in the design, implementation and optimization of automated solutions, with a constant commitment to continuous improvement and the pursuit of excellence in results. I have a great ability to work in a team, solve problems efficiently and adapt easily to dynamic and challenging environments. I stand out for my SKILLS in project management and technological innovation.
